

PRESS RELEASE

FOR IMMEDIATE RELEASE

POTHOLES IN RANDFONTEIN

Randfontein Local Municipality would like to acknowledge the current problems associated with potholes in our main routes. The problem is exacerbated by the rainy season and as such it is difficult for the municipality to keep up with the pace of re-sealing.

PROGRAMME FOR RE-SEALING POTHOLES

The Municipality has developed the programme of re-sealing of all potholes; we are expecting to rollout the programme as soon as the rains start to scale down. It is anticipated that the programme should start in March 2010 onwards. We have enlisted the services of an independent service provider to help our internal team in implementing the programme. The programme and the areas:

We are generally making an appeal to all the motorists to be vigilant on the roads and try to avoid areas that are badly affected by the problem of potholes, as it might cause damage to the vehicles or lead to serious accidents.
